

CHAPTER V

CONCLUSION AND SUGGESTIONS

In this chapter, the writer would like to present the conclusion. The writer also provides some suggestions for the readers.

A. Conclusion

After the data analysis is complete, the next step is to provide conclusions. In the film Percy Jackson the Olympians the Lightning Thief, it can be concluded that homonyms have three aspects, namely that the first aspect is in the same category and same spelling, or type of homonym is called complete, full, or absolute. Meanwhile, the second aspect is in the same category but different spelling or a type of homonym called a partial homonym. Next, the third aspect is the different categories but the same spelling. These three aspects are based on the theory of Saeed in Ghoy et al (2022: 3-4). These three aspects have been grouped in each form of table, namely, in the same category and same spelling, there are 5 words that are homograph, in the same category but different spelling, there are 14 words that are homophone, and in different categories but the same spelling, there are 4 words that are heteronym.

B. Suggestions

Finally, the writer suggest that readers can learn more about the homonym's words and also the meaning of the homonym's words from the film "Percy Jackson The Olympians The Lightning Thief" by Chris

Columbus. The film released in 2010 has a very fun story and Greek nuances by introducing gods and creepy creatures in ancient Greek times so that it makes this film seem unique and interesting, but behind the story of the film, the writer has analyzed the film Percy Jackson The Olympians The Lightning Thief contains homonyms words that the writer can use this film as data. From the result of the writer analysis of looking for homonyms words and the meaning of each homonyms word, she hopes that the results of this study can be useful and inspire readers to continue learning and looking for unique things through words.
